

Serial No. 10/029,447

In the Claims:

1. (original) A privacy filter for use on an electronic display screen comprising:  
a flexible sheet of photopolymer film having a 180 degree field of view  
perpendicular to a first side of said sheet,  
said sheet of photopolymer film having at least one holographic image exposed  
thereon wherein  
said at least one holographic image is not visible within a central field of  
view, and  
said at least one holographic image is visible within left and right  
holographic fields of view disposed to the left and right sides of said central field of view.
2. (original) The privacy filter of claim 1 wherein said central field of view is about  
45 to about 60 degrees in angular dimension symmetrically centered about a centerline  
extending perpendicular to said sheet.
3. (original) The privacy filter of claim 1 wherein said left and right holographic  
fields of view are about 30 to about 45 degrees in angular dimension symmetrically  
arranged on opposing sides of said central field of view.
4. (original) The privacy filter of claim 2 wherein said left and right holographic  
fields of view are about 30 to about 45 degrees in angular dimension symmetrically  
arranged on opposing sides of said central field of view.
5. (original) The privacy filter of claim 1 wherein said central field of view is about  
60 degrees in angular dimension symmetrically centered about a centerline extending  
perpendicular to said sheet and said left and right holographic fields of view are about 30  
degrees in angular dimension symmetrically arranged on opposing side of said central  
field of view.

Serial No. 10/029,447

6. (original) The privacy filter of claim 1 wherein said at least one holographic image comprises a plurality of individual holographic images arranged in a predetermined pattern on said sheet of photopolymer film.
7. (original) The privacy filter of claim 6 wherein said central field of view is about 45 to about 60 degrees in angular dimension symmetrically centered about a centerline extending perpendicular to said sheet.
8. (original) The privacy filter of claim 6 wherein said left and right holographic fields of view are about 30 to about 45 degrees in angular dimension symmetrically arranged on opposing sides of said central field of view.
9. (currently amended) The privacy filter of claim 7 & wherein said left and right holographic fields of view are about 30 to about 45 degrees in angular dimension symmetrically arranged on opposing sides of said central field of view.
10. (original) The privacy filter of claim 1 further comprising a layer of adhering material disposed on a second side of said photopolymer film for adhering said photopolymer film to the surface of a display screen.
11. (original) The privacy filter of claim 10 wherein said layer of adhering material comprises a sheet of static cling vinyl.
12. (original) The privacy filter of claim 10 wherein said layer of adhering material comprises a layer of a pressure sensitive adhesive.
13. (original) The privacy filter of claim 10 still further comprising a protective coating disposed on said first surface of said photopolymer film.
14. (original) The privacy filter of claim 6 further comprising a layer of adhering material disposed on a second side of said photopolymer film for adhering said photopolymer film to the surface of a display screen.

Serial No. 10/029,447

15. (original) The privacy filter of claim 14 wherein said layer of adhering material comprises a sheet of static cling vinyl.

16. (original) The privacy filter of claim 14 wherein said layer of adhering material comprises a layer of a pressure sensitive adhesive.

17. (original) The privacy filter of claim 14 still further comprising a protective coating disposed on said first side of said photopolymer film.

18. (currently amended) A privacy filter for use on an electronic display screen comprising:

a first flexible sheet of photopolymer film having a 180 degree field of view perpendicular to a first side of said sheet,

said sheet of photopolymer film having at least one holographic image exposed thereon wherein

said at least one holographic image is not visible within a central field of view, and

said at least one holographic image is visible within a left holographic field of view disposed to the left of said central field of view; and

a second flexible sheet of photopolymer film having a 180 degree field of view perpendicular to a first side of said sheet,

said sheet of photopolymer film having at least one holographic image exposed thereon wherein

said at least one holographic image is not visible within a central field of view, and

said at least one holographic image is visible within a right holographic field of view disposed to the right of said central field of view,

said first photopolymer film being disposed in overlying with said and  
second photopolymer films ~~being disposed in overlying relation.~~

Serial No. 10/029,447

19. (original) The privacy filter of claim 18 wherein said central field of view is about 60 degrees in angular dimension symmetrically centered about a centerline extending perpendicular to said sheet and said left and right holographic fields of view are about 30 degrees in angular dimension symmetrically arranged on opposing side of said central field of view.
20. (original) The privacy filter of claim 18 wherein said at least one holographic image in each of said first and second sheets of photopolymer films comprises a plurality of individual holographic images arranged in a predetermined pattern on said first and second sheets of photopolymer film.
21. (original) The privacy filter of claim 18 further comprising a layer of adhering material disposed on a second side of said second photopolymer film for adhering said photopolymer films to the surface of a display screen.
22. (original) The privacy filter of claim 21 wherein said layer of adhering material comprises a sheet of static cling vinyl.
23. (original) The privacy filter of claim 21 wherein said layer of adhering material comprises a layer of a pressure sensitive adhesive.
24. (currently amended) The privacy filter of claim 21 still further comprising a protective coating disposed on said first ~~surface~~ side of said first photopolymer film.
25. (currently amended) The privacy filter of claim 19 further comprising a layer of adhering material disposed on a second side of said second photopolymer film for adhering said photopolymer film to the surface of a display screen.
26. (original) The privacy filter of claim 25 wherein said layer of adhering material comprises a sheet of static cling vinyl.

Serial No. 10/029,447

27. (original) The privacy filter of claim 25 wherein said layer of adhering material comprises a layer of a pressure sensitive adhesive.

28. (currently amended) The privacy filter of claim 25 still further comprising a protective coating disposed on said first side of said first photopolymer film.

Claims 29-48 (canceled)
